# 3-POINT STATIONARY FAN BOARD SHOOTING STATION

## SPECIFICATION SHEET

Jaypro Model N2FB, 3-point stationary fan board shooting station shall be a wall mounted and wall braced unit extended 9" to 2'-0" from the supporting wall. System is designed to consist of three (3) pipe extension frames. System comes complete with 36" aluminum fan board (ALB-24BT), collegiate "shot" breakaway goal (GBA-548), frame, fittings, hardware, and wood stringers.

Pipe extensions frames shall consist of 1.90" O.D. high strength galvanized pipe. Frame shall attach to both the wall and board with heavy duty fabricated steel brackets. Frame pipes are to be cut in the field to achieve the desired extension off the wall between 9" to 2'-0".

Frame structure shall attach to the wall using 2" x 8" southern yellow pine wood stringers. Stringers shall be supplied with routed edges and finished with two (2) coats of clear lacquer. Wood stringers are supplied pre-drilled and counterbored holes to assemble the brackets for quick and easy assembly. **Systems that are not supplied with holes pre-drilled and counterbored shall not be approved as equals.**

Goal shall be mounted directly through the backboard into heavy-duty structural steel fittings to eliminate any strain on the bank should a player hang on the front of the mounted shooting station.

Due to close proximity to the wall, it is highly recommended to pad the wall behind the unit for player safety.

All structure and fittings shall be supplied with a durable black powder coat finish. All components are packaged for protection during shipment. All wall mounted anchors shall be specified and supplied by others.

System shall weigh 264 pounds.

### WARRANTY

Jaypro N2FB shooting station structure comes with a 25 Year Limited Warranty. Limited Lifetime Warranty on all Jaypro backboards when used in conjunction with the N2FB shooting station. Other components may be covered under their own extended warranty.
